Your Spraying & Mixing Partner

K-Ball™ adjustable clip-on nozzles feature a 'finger system' that holds the spray ball in alignment while the cap is tightened. Standard models in stock and color coded for easy identification. Made from durable, non-corrosive glass reinforced polypropylene. Stainless steel spring clips allow operating pressure up to 100 psi.

Custom built for your unique applications by your spraying & mixing partner.

BEX makes it easy for you to set up and maintain your system with quick disconnect parts and technical support ready to answer your call.

Choose from the thousands of parts in stock and ready to deliver –
with the quality you've come to rely on.

Zip-Tip® nozzles in molded plastic, brass, 303 and 316 stainless allow for quick changes without disturbing spray alignment. Reduce maintenance time and cost. Available in a wide range of sizes and spray patterns. Also available – riser supports, clamps and stand offs.
