

FV95 SPRAY NOZZLE SPECIFICATIONS

Spray angle not exactly as shown.

SPRAY CHARACTERISTICS:

FV-Series low flow rate spray nozzles produce a flat, fan-shaped spray pattern, with spray angles available from 15° to 110°. Spray density tapers off toward the outside of these sprays, to permit overlapping of spray patterns while maintaining uniform spray density.

CONSTRUCTION:

The models listed are machined from bar stock and are one piece construction. Standard materials are brass, 303 stainless steel and 316 stainless steel. Other materials may be available upon request.

All parts are made with a female thread on the inlet to install BEX® strainers.
