

# FV50 SPRAY NOZZLE SPECIFICATIONS

50° SPRAY ANGLE · FLAT SPRAY · THREADED

Spray angle not exactly as shown

## SPRAY CHARACTERISTICS:

FV-Series low flowrate spray nozzles produce a flat, fan-shaped spray pattern, with spray angles available from 0° to 110°. Spray density tapers off toward the edge of the pattern, to permit overlapping of spray patterns while maintaining uniform spray density. Suitable for a variety of washing and spraying applications.

## CONSTRUCTION:

The models listed are machined from bar stock and are one piece construction. Standard materials include Brass, 303 Stainless Steel, and 316 Stainless Steel.

PIPE SIZE (NPT)	Length L (inches)	Dim. A (inches)	Internal Thread	Dim. B (with strainer assy) (inches)
1/8	13/16	7/16 HEX	1/4-28 UN F	1.34
1/4	15/16	9/16 HEX	3/8-24 UN F	1.68

## ACCESSORY OPTION

Due to the extremely small orifice on this nozzle, it is typically sold with a strainer accessory, which helps to avoid clogs. Mesh sizes are available in 50, 100, and 200.

FVL nozzles feature an internal thread for attaching a mesh strainer (L50, L100, or L200)
