**BEX
Mini
Tank
Mixing
Eductor**

Compact design maximizes circulation.

The Mini Eductor works in the same way as larger eductors but on a much smaller scale. The Venturi design allows smaller pumps to take advantage of the surrounding liquid to create a high velocity flow yield at the diffuser.

Features:

- Circulation yields 4 to 5 times inlet flow
- Compact design is great for small tanks
- Color coded for easy identification
- 1/4" Polypropylene and PVDF

Typical applications:

- Plating Tanks
- Cleaning Tanks
- Phosphating Tanks
- E-coat Tanks
- Fertilizer Tanks
- Pulp Tanks
- Sludge Tanks
- Paint Booths
- Anodizing Tanks
- Cooling Towers
- Decorative Fountains

BEX Mini Tank Mixing Eductor

BEX eductors use a unique venturi design which enables smaller pumps to circulate large volumes of tank solution. The eductor will circulate four to five gallons of solution for each gallon pumped.

BEX eductors are used for mixing chemicals, suspending solids, adjusting pH "sweeping" debris or sludge toward a filter intake and many other useful applications.

This capacity chart provides the flow of water through the nozzle orifice at various pressures and the expected circulation rate.

Model Number	Color	Orifice Diameter	Nozzle flow (GMP) at various pressures (PSI)					
			10	20	30	40	50	
TMMP6	Red	.059	Inlet Flow Rate	.31	.43	.53	.61	.68
